WORK PROJECTS

Dance Studio Class & Rent Scheduler (J.A.C. R&D)

Description: A booking system for dance classes and studio rentals that manages time availability for different studio branches. Integrates online payment through Paymongo for online transactions.

Technology: Google Cloud | REST API | Django | Angular | Paymongo

Lost & Found System (Upwork)

Description: A retrieval and submission system for lost items. It uses an account system for system admins to access the complete records. Students can retrieve and report lost items through the system.

Technology: Kivy | Supabase

Card Matching Multiplayer Game (Fiverr)

Description: A multiplayer game that uses a socket library for client-server communication. It is a multiplayer game built on Pygame, with the main goal of being the first to match all pairs of cards.

Technology: Pygame | Socket | Google Cloud

WORKSHOPS

DOST-SEI Scholars Leadership Camp (2026)

Participated in a leadership boot camp for government DOST-SEI scholars, enhancing skills in project pitching, collaborative problem-solving, and community-centric leadership.
